BULK E-Way Bill Generation

(http://gst.kar.nic.in/ewaybill)

(Ver 1.0 Dated: 20.09.2017)

This is one more method to generate the multiple e-way bills in one-go by the tax payers of transporters. This can be used by the two categories of tax payers. First, those tax payers who have automated their supplies but enable to use the API interface because of various reasons. Second, the tax payers/transporters who want to generate the e-way bills in one shot by entering the e-way bill details in one excel type of file as and when order comes. And after finalization of the entries, including may be vehicle number, generate the EWB number. This avoids entering one-by-one in the EWB system and generate the EWB Number.

In this process, the tax payer logs in to the E-Way Bill system and uploads the file containing the multiple requests for EWB as per the format. The system generates the EWB number for all these requests one-by-one and shows the result in table. Otherwise it shows error details. The table details can be cut and pasted into user's system for further use and action.

I. Preparing Bulk EWB request file

There are two methods for generating the Bulk EWB requests. First, the tax payers can prepare the Bulk EWB request file as follows.

1. In the bulk EWB generation method, the request for e-way bill is accepted in the JSON format. Please refer to excel file for the format and parameters of the JSON request file.
2. Ensure the codes are included in the JSON for the parameters as specified in the code list. Please refer to the code list in the excel file.
3. JSON file with multiple requests are allowed. However, prepare the JSON file with around 500 requests to avoid uploading challenges.
4. Validate all the parameter value as per the format, codes and interlinked values before preparing the JSON file.

Please refer to above links for format of JSON, master codes and error codes and sample JSON file.

OR

Second method is 'Bulk EWB converter tool'. This tool has been provided on the demand of the tax payers as alternative mechanism. This tool can be downloaded by the tax payer from the portal and 'instructions to use' has been provided in the tool itself. It is not necessary to use this tool. The tax payer can prepare similar tool or use first method and use.

Using the EWB bulk converter tool, the tax payer can prepare this JSON file. This tool will allow you to enter the requests in excel file and allow to validate and convert into JSON file. For this use the attached file below.

II. Generating the EWB from bulk file

1. User logins to the e-way bill portal with his credentials.
2. Select the 'Generate Bulk' option in the 'Generate EWB' menu.
3. Upload the EWB request file.
4. On click of 'Choose file' button, the system will request to select the JSON file
5. Next on click of 'Upload & Generate' button, the system generates the EWB for error free requests and shows the EWB Number in the grid for them.
6. Now, the user can cut and paste the results from the grid into his system and use them. In case of error related requests, correct the error and generate the file again and process accordingly.

III. Preparing Consolidated Bulk EWB request file

There are two methods for generating the Consolidated Bulk EWB requests. First, the tax payers and transporters can prepare the Consolidated Bulk EWB request file as follows.

1. In Consolidated bulk EWB generation method, the request for trip sheet is accepted in the JSON format. Please refer to excel file for the format and parameters of the JSON request file.
2. Ensure the codes are included in the JSON for the parameters as specified in the code list. Please refer to the code list in the excel file.
3. JSON file with multiple requests are allowed. However, prepare the JSON file with around 200 requests to avoid uploading challenges.
4. Validate all the parameter value as per the format, codes and interlinked values before preparing the JSON file.
